Attorney Docket: 66555-43734

## ABSTRACT OF THE DISCLOSURE

A ladder assembly is specifically configured to be attached to an upright tailgate of a vehicle in a manner 5 facilitating the ingress and egress of personnel into and out of such a vehicle while the tailgate remains in its upright position. The ladder assembly preferably comprises an attachment portion having a pair of clamps that allow the ladder assembly to be firmly attached to tailgates of differing thickness. The ladder assembly also preferably comprises a ladder portion that can be both folded and selectively inclined.
